

# COVID-19 Direct Care Skill Set

State ID: EAB63

## About this course

### Infection prevention and control skills

In response to the rapidly changing COVID-19 situation, there is an **urgent demand for aged and disability workers trained in providing safe personal care and support**. These skills have never been more important for those working or looking to work in the health and community services sectors.

The current situation may have you feeling like you need to refresh your skills so you can confidently protect yourself and your clients whilst providing support and care. This skill set will give you the training you need to update or develop your infection prevention and control skills.

Delivered through a mix of both online virtual classrooms and on-campus study, this course will give vital skills to existing health, aged and disability worker, along with those looking to start a career in these industries.

You will gain the skills you need to deliver care and support, utilise infection control measures and safe manual handling techniques.

You'll complete **three nationally accredited units**:

- HLTINF001 Comply with infection prevention and control policies and procedures;
- HLTWHS005 Conduct manual tasks safely; and
- CHCCCS011 Meet personal support needs

If you are taking your first steps on the pathway to a career in a health care setting, completion of this skill set can also help you on your way to gaining a Certificate III in Individual Support.
