

CyberSecurity Awareness for Beginners

State ID: SC-JTE-V1424

About this course

Gain an understanding of basic cyber security principles that you can apply at home or the office

This course is aimed at **novices** and will give you an **introduction** into **cyber security awareness**. You'll gain a quick understanding of the broad principles and terminology required to secure your IT assets at home or in a small business.

This course is also suitable for **professional development** to ensure employees have a basic understanding of cyber awareness, so they do not become victims to social engineering practices.

On completion of a short quiz, to ensure you understand the content, you will receive a Certificate of Participation.

Details

During your course of study, NMTAFE may use a variety of learning practices to ensure you get the best outcome for your learning journey.
