

# Gas authorisation (category 2)

State ID: SC-MAT-V1294

## About this course

If you are looking to add a Gas Authorisation Category 2 qualification to your existing trade or engineering qualifications, complete North Metropolitan TAFE's 10 day course and you'll be able to service and maintain Type B gas appliances. This course will give you the skills you need to gain Gas Authorisation (Category 2) from Energy Safety WA.

If you have already successfully completed the appropriate two day supervised gas fitter course within two years of enrolling in this course then you will only need to complete an additional eight days of training.

You'll cover details such as:

- legislation
- OH&S
- gas and system components
- tools and equipment
- electrical and gas safety and isolation procedures
- plans and diagrams
- testing and servicing equipment

For more information about our Category 2 Gas Authorisation course view [our flyer](#).
