

TIG welding (Tungsten Inert Gas)

State ID: SC-MHF-V1259

About this course

Enhance your existing welding skills or learn new techniques

North Metropolitan TAFE offers courses to train you in the use of **TIG** or gas tungsten arc welding (**GTAW**) processes. You'll gain professional techniques to work with a variety of ferrous and non ferrous materials so you can **manufacture and assemble projects** in **carbon steel**, **aluminium** and **stainless steel**.

You'll start with recognising hazards, the safe use of the welding equipment and welding terminology and defects. You will receive demonstrations and guidance on correct technique to develop your skills. o

Dress requirements

You will be required to wear personal protective clothing/equipment at all times which includes steel capped safety boots, clear safety glasses, long drill cotton pants and cotton drill long sleeve shirt.
