

REVIT essentials for architecture

State ID: SC-PBC-V1312

About this course

Develop new skills in 3D modelling

This course will introduce you to Autodesk REVIT, a building modeller for architectural design and documentation in 3D and 2D. You will learn the concepts of 3 dimensional computer modelling and gain an understanding of the tools required for parametric building design and documentation using REVIT Architecture.

Course Outline

After completing this course you will be able to:

- Understand the benefits of 3 dimensional modelling
- Use the fundamental features of REVIT Architecture
- Use the parametric 3D design tools to design projects
- Create detailing and drafting views
- Create construction documentation
- Use the presentation tools for design visualization

Courses are one day per week for four weeks.
