

# METAL MACHINING FOR BEGINNERS

**This course will provide participants with practical skills in basic machining on lathes, milling machines and ancillary machines such as pedestal drills and grinders.**

Participants are welcome to bring in their own projects and discuss their suitability with the lecturer. Examples of suitable projects might include metal craft work, hobby train or aeroplane projects. Project exceptions will include vehicle components and weapons.

You will be required to wear personal protective clothing at all times which include steel capped safety boots, clear safety glasses, long pants and cotton drill shirt.
